

Better Startup Performance

Tip #1

To obtain a better startup performance, IN WINDOWS 10;

- GO TO CORTANA.

- TYPE IN TASK MANAGER YOU WILL SEE ALONG THE TOP TABS, SELECT IT AND IT WILL SAY “STARTUP”, AT THE SCREEN YOU WILL SEE FILES THAT ARE ENABLED.

- GO TO EACH FILE AND ON YOUR MOUSE;

- PRESS THE RIGHT BUTTON AND DISABLE THOSE FILES.

- CHOOSE ONLY FILES THAT YOU DO NOT WANT TO BOOT UP WHEN WINDOWS STARTS. (If you do not know or understand what that file is?

- Go to GOOGLE

- Type in the file name it will tell you what the file is (and how it effect Windows).
