

San Bruno is evolving. Our population is increasing; developers are building here; and big name businesses are establishing their foundations in our City with a Heart. These changes are necessary to move San Bruno forward and provide revenue streams to fund overdue and much needed improvements throughout our City infrastructure and overdue capital projects, e.g., library, parks, fire station. Change will also come with impacts to our existing community making it more important than ever to have strong leadership willing to ask tough questions and listen to community needs. Through my actions as a Council Member, I have demonstrated that I am that leader.

As your Mayor I would continue to identify opportunities to diversify our revenue streams including exploring a charter city model and identifying public/private partnership opportunities. I commit to continue to envision our City's future as one that provides sound infrastructure, capital projects, fiscal accountability and, most importantly, sustainability.

In the midst of this global pandemic, communication is key. As your Mayor I would continue to provide timely communication about changes impacting our daily lives and opportunities for assistance. We are in this together and I am committed to you. I enthusiastically request your vote.
